#### EXPERIENCE

## Full Stack Developer

June 2022 - Present

SF Civic Tech

Remote

- Developed and shipped high-quality websites and design systems using JavaScript, TypeScript, React, PostgreSQL, Node.js, and CSS
- Collaborated with cross-functional teams to create innovative technology solutions for civic and social challenges
- Architected technical tools including content management systems, REST APIs, and CI/CD pipelines for industry-standard projects

## Front End Developer

September 2022 – September 2023

OpenStreetMap

Remote

- Engineered and enhanced features of OpenStreetMap's map data editing interface using React, JavaScript, CSS, Node.js, and Leaflet
- Built a database admin analytics tool analyzing 10,000+ data points, providing insights into user behavior and website performance
- Implemented GitHub API integration for issue reporting, facilitating direct communication between users and maintainers

## Lead Software Developer

March 2022 - August 2023

Tech 4 Good

Santa Cruz, CA

- Led multiple teams in designing and developing research-focused web applications using Angular, TypeScript, NgRx, and Firebase
- Collaborated with research teams to propose technical solutions for social computing projects and provided mentorship within the engineering department
- Spearheaded lab-wide accessibility initiatives by establishing best practice documentation and accessibility checklists for developers

## Software Engineer Intern

February 2023 – June 2023

ChargePoint

Campbell, CA

- Implemented industry-standard software testing techniques with Python and Jenkins, improving testing productivity by 70%
- Developed an automated regression testing system using Jenkins, accelerating performance validation of electric vehicle charging products
- Enhanced internal Python framework to generate JUnit-XML test reports within Jenkins, facilitating clear visualization of test outcomes

## Projects

Support SFUSD | Next.js, React, TypeScript, Prisma, Tailwind CSS, HTML, CSS

- Spearheaded the web app development, enhancing community engagement and support for SFUSD schools
- Built responsive UI components and optimized database schemas with Prisma to ensure efficient data flow

SF Ready Meals | React, Express, Sequelize, PostgreSQL, Heroku

- Engineered a fulls-stack web app for finding free/low-cost nutritious meals from participating organizations in the Congregate Nutrition Program
- Successfully delivered all project goals, leading to project adoption by SFHSA for website integration

#### EDUCATION

Udemy

## University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Arts in Computer Science; GPA: 3.9

June 2023

Remote

The Complete 2023 Web Development Bootcamp

December 2023

#### TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, HTML, CSS, Python, Swift, MySQL, SQL

Libraries & Frameworks: React, Angular, Express, Node.js, Django, Next.js, Prisma, Gatsby, Tailwind, Bootstrap Tools & Platforms: PostgreSQL, MongoDB, Git, GitHub, Netlify, Vercel, Heroku, Docker, Firebase, Figma, Jenkins
